SUMMARY

Software Engineer with 5+ years of experience, incredibly passionate about all things software related. I have specialized in Front End throughout most of my career, but my heart lies within solving complex problems and I love to take on different aspects of software engineering. My free time is currently spent developing a commercial game for Steam, IOS and Android using Unity, C# and .NET.

SKILLS AND TECHNOLOGIES

Languages: JavaScript, TypeScript, C#, HTML, CSS, SQL.

Frontend: React, Redux, Next.js, Vue.js, Sass, LESS, Tailwind, Styled-Components

Backend: Node.js, Express.js, .NET, SQL, MongoDB

DevOps & Tools: AWS, Git, CI/CD, Docker, Vercel, Webpack, GraphQL, Jira Automation

Testing: Storybook, Jest, Cypress

Other: Data Structures and Algorithms, UI/UX, Accessibility (WCAG), Agile Methodologies, SCORM

EXPERIENCE

Dun & Bradstreet | Software Engineer (Full-Time)   Jul 2024 - Sep 2024 Mass Layoff | Remote (USA)

- Worked primarily in developing and improving the TypeScript, React and Redux based frontend of D&B Hoovers, a sales and marketing tool for business.
- Optimized our Webpack bundle size down from 28mb to 10.3mb, drastically improving user experience, Core Web Vitals metrics and reducing cloud related financial costs.
- Introduced analytical tools through Node.js that measured different aspects of our applications building process. Enabling further optimization in rebuild time from 70~ seconds down to 10~ seconds, massively improving developer experience and productivity across our entire development team.

Estadão | Senior Frontend Engineer (Full-Time)   Sep 2022 - Sep 2023 | Remote (BR)

- Built and scaled an internal React component library for the Estadão news site CMS. Components were used to deliver content to over 150 thousand subscribers and 47 million viewers per month.
- Created CI/CD pipelines that reduced the number of bugs and recurring incident reports by over 20% in the following month.
- Developed a solution to dynamically generate AMP pages and optimize search results that reflected in an average of 30% increase in Core Web Vitals metrics.

CI&T | Frontend Engineer (Full-Time)   May 2021 - Jan 2022 | Remote (US)

- Worked with Johnson & Johnson's international team to develop an open source bodiless content management solution that served their repository of over 300 customer facing sites. (bodiless.js)
- Personally developed a structured data solution that tracked content changes and generated dynamic SEO Schemas.
- Developed the United Nations Children's Fund platform for career improvement (1mio), being personally responsible for developing and styling every frontend component of their application.

Simpleshow | **Frontend Engineer (Contract)**   Nov 2020 - Sep 2022 | Remote (US)

- Built interactive web courses tailored to eLearning for multiple Fortune 500 clients.
- Developed gamified, customizable quizzes consisting of navigation menus, animated, draggable, and sortable components.
- Mastered an internal JavaScript framework to develop accessible, SCORM compliant, and 100% modern browser compatible eLearning courses.

TOTVS | **Junior Frontend Engineer (Full-Time)**   Mar 2020 - Oct 2020 | Remote (BR)

- Built and maintained a CRM tool, introducing new features, managing task backlog. (TOTVS CRM)
- Created documentation to help onboard new developers to companies projects, facilitating the onboarding process and saving hundreds of hours on getting developers up to speed.

EDUCATION

Ironhack |Certificate: Full Stack Web Development (Full-Time)   Aug 2019 - Oct 2019 | Miami, FL (US)

- Awarded the Facebook Digital Creators Fund scholarship.
- Completed an intensive 400+ hour MERN full stack development bootcamp.

LANGUAGES

English (Native), **Portuguese** (Native), **Spanish** (Advanced).
